

What hazardous materials are inside most computers?

- ① **Lead** in cathode ray tube and solder
- ② **Arsenic** in older cathode ray tubes
- ③ **Selenium** in circuit boards as power supply rectifier
Polybrominated flame retardants
- ④ **Polybrominated flame retardants** in plastic casings, cables and circuit boards
- ⑤ **Antimony** as flame retardant
- ⑥ **Selenium** in circuit boards and semiconductors
- ⑦ **Selenium** in steel for corrosion protection
- ⑧ **Cobalt** in steel for structure and magnetivity
- ⑨ **Mercury** in switches and housing
